PROJECTS

Medical Website

About the Project

- Developed a comprehensive medical website enabling patients to obtain prescriptions by answering doctor-provided questions, streamlining the prescription process and enhancing patient convenience.
- Created a user-friendly interface with appointment booking functionality, empowering patients to schedule appointments online and facilitating efficient doctor-patient communication.
- Implemented a flexible doctor assignment feature, allowing patients to easily change their healthcare provider based on their preferences and needs, improving patient autonomy and satisfaction.

Hackathon Website

About the Project

- A platform which provides facility of registration, login and uploading solutions in pdf format.
- An user can login and this platform authenticate user with a web token so that data of user cannot be breached.
- [Live](#)

SUMMARY

As a B.Tech. student with a focus on software development, I possess a strong foundation in programming languages such as Python, C++, HTML, and CSS. In addition, I have gained expertise in developing web applications using the Django framework. I am a dedicated and passionate individual who takes pride in delivering high-quality work and exceeding expectations. My experience working in teams has helped me develop strong leadership and teamwork skills, allowing me to effectively communicate and collaborate with others towards achieving common goals. I am committed to continuous learning and development, seeking out new challenges and opportunities to grow both personally and professionally. With my technical knowledge and interpersonal skills, I am confident in my ability to make a positive impact in any software development team.
